Central Processor

KB-D100

The KB-D100 central processor provides a convenient solution to monitor and control settings and events in complex public address systems space. With a 12 inch touchable screen it is easy to operate and to control all other KB units.

Main features include:

- Weekly, daily, or monthly cycle options
- Digital zone selector for different zone speakers
- Digital audio matrix flexible to control up to 16 channels
- Power on / off programmable
- Fire alarm / zone paging
- Paging all function, 4 player sources provided
- Microphone in port for paging
- Easy to add / del / edit programs
- Electronic level indicator for every player
- Support all formats that can be played in Microsoft media player

When it is used with the KB-D816S Audio Matrix, the KB-D100 reveals the source inputs for each of the amplifier output channels. Any of the source inputs can be selected and fed into any of the amplifier outputs, which greatly increase the convenience of operation.

The KB-D16T Program Timer works optimal with the KB-D100 to provide control over the PA systems timed events and programs. Channel settings and status can be reviewed with a quick glance.

For speaker zone selection, the KB-D13A 16-zone speaker selector partners with the KB-D100 to provide convenient labeling and selection of up to 16 speaker zones. All zones can be quickly selected on and off for greater convenience in operation.

KB-D816S

16 X 16 AUDIO MATRIX

The KB-D816S Audio Matrix is the best choice for an advanced control unit which has the functions of setting weekly timed playback schedules and multi-source music distribution. This control unit integrates 16 source inputs, 16 amplifier outputs and a priority bus interface. This unit can play, stop and play again background music automatically according to the program settings. At the same time, it can mute background music whenever it has received priority input signals for zone paging and emergency alarms.

- 16 inputs, 16 outputs
- LCD display and for convenient operation program schedules
- Priority bus for zone paging and emergency alarms
- RS-485 interface provides communication with KB-D100 central processor

KB-D816R

REMOTE PAGING MICROPHONE

- Control up to 8 pcs of KB-D816S

KB-D10P

16-ZONE PAGING SELECTOR

The KB-D10P is a versatile 16 zone paging selector that is capable to select up to 16 paging zones and has 4 priority levels. Up to 8 units can be cascaded to control 128 paging zones.

It has a direct microphone input, 4 remote microphone inputs, 2 line inputs, internal chime and a priority channel mute. The KB-D10P can be used with the KB-D13A speaker selector to select the paging zone.

The KB-D10P can be operated by selecting zones using the selector pushbuttons. It can also be operated remotely using the KB-D10R microphone console.

- 16-zone paging, expandable up to 160 zones with additional units
- Supports up to 4 remote paging mics

REAR PANEL

KB-D10R

16-ZONE REMOTE PAGING STATION

The KB-D10R Remote Paging Microphone works together with the KB-D10P Paging Selector.

It is easily operated by pressing the zone selector buttons on the panel to access the corresponding zone of the KB-D10P to achieve remote paging to every zone. The KB-D10R can control up to 8 KB-D10P separately for a total of 128 zones.

- Links to additional paging mics
- Balanced signal input for quality and distant transmission up to 1000m
- Address selector provides for accessing additional paging selectors
- LINE IN for connection to audio source
- Control up to 8 pcs of DCI-10P

KB-D11P

9-INPUT MIXER PRE-AMPLIFIER

The KB-D11P is a versatile mixer pre-amplifier with 5 microphone inputs, 3 auxiliary inputs, 1 balanced input and mute function.

MIC1, EMC1, EMC2 are priority inputs. When either one is activated, provision is made to mute all signal inputs automatically.

Output from the KB-D15E emergency panel to EMC1 provides alarm siren or emergency announcement to be broadcasted over the public address system.

- 9 inputs, 2 outputs
- Automatic mute function for paging and announcements
- Individual input gain controls with master volume control
- Bass and treble tone controls
- 7-band Equalizer

KB-D13A

Speaker Selectors

16-ZONE SPEAKER SELECTOR

The KB-D13A is a flexible multi-input speaker selector arranged in a 4*4 matrix with priority override. 16 speaker zones are divided into 4 groups, where each group can be fed with a separate audio source. A priority bus is provided to mute background music for zone paging and emergency alarms.

- RS-485 interface - connects to KB-D100
- LCD display for easy programming.
- Support up to 4 audio sources and 4 alarm inputs

KB-D13B

16 ZONE SPEAKER SELECTOR

Easy operation with all on / all off buttons and Clear indication of zone state with different colour indication

- 16 zones selector on/off switch with 16 status indicators
- Provides an alarm audio signal input (70/100 V) and a BGM audio signal input (70/100V)
- Allows All On/All Off
- Easy remote control for device power on/off, zone control and status access
- Total power capacity reaches 1.2 KW and 150 W for each channel
- Deliver voice alarm triggered by 0 V short circuit signal
- Possess an alarm trigger output for system extension of voice alarm
- Proves an address dip on rear panel for system configuration

WORKING MODES

KB-D15E

Emergency Panel

The KB-D15E emergency panel produces an alarm sound automatically when activated by an external signal or manually by pressing the front panel pushbutton. The alarm can either be the built-in siren or a user pre-recorded voice message.

With the built-in 180-second digital IC, users may record their own voice message by using a microphone or other audio sources.

For use in a wide variety application of PA system, the DCI-15E is designed to work with the KB-D10P paging selector, the KB-D11P pre-amplifier, the KB-D19A alarm matrix and the KB-D13A speaker selector.

KB-D16T

PROGRAMMABLE TIMER

KB-D16T is a power source programmable timer which provides a LCD display and 3 menu buttons to control up to 6 power source outputs. The system includes holiday and day off functions for automatic shutdown. User-friendly menu operation is offered to achieve various timed event. The KB-D16T can optionally work with the KB-D28S power sequencer to provide an ideal solution for control over the PA system's scheduled power on / off.

KB-D18I

TELEPHONE INTERFACE

The KB-D18I can automatically answer incoming phone call and broadcast the caller's voice over the public address system and to individual zones. A microphone input is provided for talking back to the caller. It can also be used to start up the PA system and activate other equipments remotely.

- Built-in monitor speaker and volume control
- Automatic or manual mode optional
- Activation output can be used to trigger other equipment remotely

KB-D19A

32-CHANNEL ALARM MATRIX

The KB-D19A connects between a facility's fire alarm system and public address system. With support for up to 32 zones, any zone that has a fire alarm will force adjacent zones into an emergency situation that warns personnel to evacuate.

Fire alarm signals are inputted the unit's rear panel connector. Alarm signal outputs are divided into two groups.

The rear panel ADDRESS code switch is used to set the adjacent zone number. For example, dialing code 2 denotes adjacent zone +1/-1. Up to 9 adjacent zones can be set.

An RS-485 interface is provided to connect to the KB-D100 central processor for convenient monitoring of zone status.

KB-D20S

16-CHANNEL 24 VDC SUPPLY

The KB-D20S is a 16-channel switching power supply for use in a public address system to provide 24 VDC auxiliary power for volume control override and other emergency equipment. The power supply outputs are activated by 16 individual channel inputs thereby permitting remote switching of the PA system.

KB-D25L

LIGHTNING ARRESTOR

KB-D25L provides protection for PA system that uses outdoor speakers from potential damage caused by thunderstorm and lightning. 4 independent channels provide protection for up to 20A of audio power per channel. When a channel exceeds the threshold, the speakers are disconnected from the rest of the system to prevent damage to other equipment.

KB-D28S

POWER SEQUENCER

The KB-D28S power sequencer manages the PA system's power consumption by individually controlling activation of up to 16 system components in order to prevent overloading the AC mains. The power sequence can be started by the KB-D16T programmable timer, thus giving an even greater degree of control. The KB-D28S has a total capacity of 2KW.

KB-D629C

10-ZONE LINE SUPERVISORY

The KB-D629C is a high quality, compact line supervisory. It has 10 independent circuits supervising up to 10 zones, and LED monitors the status of each zone. Red LED indicates the speaker line is short circuit, while yellow indicates open circuit and no LED stands for normal condition.

- 10 independent controlled zones
- Monitoring status of each zone
- Disconnect with the speaker line from amplifier until malfunction is fixed
- Sensitivity of the resistance of each zone adjusted independently
- 3 LED status (short circuit, open circuit, normal condition)
- 3 check time cycle (40m, 80m, 120m)

Power Amplifier

KB-D3600A KB-D4600A KB-D6600A

Power Amplifiers

These commercial-grade power amplifiers efficiently deliver up to 660 watts of clean, reliable audio for public address applications.

They are ruggedly designed to give years of reliable service. They are equipped with toroidal power transformers, extensive heat-sinking, fan cooling and protective circuits.

- 100V, 70V and 4-16 Ohms transformer isolated speaker outputs
- Combination XLR / RCA Line In and Line Out connectors
- LED status indicators
- Speaker output short circuit protection

KB-A1000 KB-A1500

High Power Amplifiers

SINGLE CHANNEL POWER AMPLIFIERS

When more power is required, these high power amplifiers provide up to 1500 watts into low impedance and 70 / 100 V speaker loads.

They are ruggedly designed to give years of reliable service, they are equipped with toroidal power transformers, extensive heat-sinking, fan cooling and protective circuits.

- 100V, 70V and 4-16 Ohms transformerisolated speaker outputs
- Combination XLR / RCA Line In and Line Out connectors
- LED status indicators
- Speaker output short circuit protection

Class -D Amplifier

KB-DA1500

For mid-to-large Public Address users who need highly energy efficient amplifier with outstanding sound reproduction capability, KB-DA1500 Class-D amplifier is able to deliver pro-audio level performance, globally complaint quality and less freight that well distinguish itself from traditional monolog amplifier

FEATURES

- High efficiency Class-D amplifier
- 500 W total rated power
- 100 V/70 V output
- Balanced/Unbalanced input available
- With intelligent cooling technology
- Auto constraint of output voltage, better electromagnetism compatibility
- Full range protection

IP CENTRAL PROCESSOR SYSTEM SERVER AND CLIENT SOFTWARE

KB-E100 / KB-EC100

The KB-D Network Audio System is built upon an Ethernet network to transmit the audio data, allowing for a more advanced and flexible system.

The KB-D Network Audio System not only implements all the functions of the traditional address system, such as timed rings, broadcasting in zones and bidirectional intercom communication, but also audio broadcasting on-demand, remote program broadcasting, and so forth.

The KB-D Network Audio System can transmit the audio data over a longer distance than the Analog Public Address System. Moreover, the KB-D Network Audio System is better at processing the audio signals, with much better tone quality, clearer sound, and minor degree of decay.

FEATURES

- The Central Control Host Computer allows users to manage each sub-control room and terminal of the broadcast point to perform comprehensive public address operations
- Comes with all the functions of a traditional Public Address System
- Ethernet-Based
- Broadcast on-demand
- Records and Broadcasts Audio in Real Time
The system can connect to an external audio source (like a laptop, audio tape, hard drive, or DVD player), and uses the client software to record the audio at 128Kbps to create MP3 files in real time
- Timed Broadcasting
Network Terminals can play customized and timed broadcasts that are configured through the client software
- Multi-Zone Broadcasting
The system can specify several multi casting tasks, as well as specify specific zones to broadcast in. The network server software can remotely control broadcasted content and volume for each network terminal, and specify the zones in which broadcasting is to occur
- Speech Broadcasting
A speaker can broadcast their speech in real time using any PC connected to the network with a network microphone, and specify in exactly which zones the audio should be broadcasted
- Local Audio Amplification
The network terminals can provide audio input function
- Supports MP3 audio file conversion and 128Kbps MP3 audio file recording

KB-MIC103P

The KB-MIC103P network paging microphone with digital audio network technology includes line-in ports and one stereo output port. The microphone can be used for paging and bidirectional intercom communication with other terminals.

FEATURES

- TFT LCD screen and control buttons
- Uses an industrial-grade high-speed dual-core ARM+DSP chip that boots in less than 1 second
- Audio-out ports for connecting to the external amplifier to play audio
- Supports working anywhere as long as an Ethernet network connection is available
- Obtains an IP address automatically

IP NETWORK AMPLIFIER

KB-WT15

The KB-WT15 network terminal uses audio signal to transmit in the form of data package in LAN and WAN, which is a set of two-way audio PA system with pure digital audio processing and routing. It is used to achieve the function of multi-network integration of computer network, digital video surveillance and public broadcasting.

The KB-WT15 network terminal can be used in schools, hospitals, shopping malls, and factories.

FEATURES

- Two way communication via pure digital transmissions
- Built-in double network interface switch
- Apply DSP stereo sound disposal technology enabling better sound reproduction capability
- With intelligent cooling technology
- Auto constraint of output voltage, better electromagnetism compatibility
- Full range protection

Rack Mount IP NETWORK TERMINAL

KB-RT15 / KB-RT30

The KB-RT15/KB-RT30 network terminal applies robust 2U industrial panel suitable to cabinet rack mount. On top of flexible two way audio signal routing for both on-demand broadcast and multicast, the Innovate two channel concept increases the efficiency of operation and fundamentally cost down

The KB-RT15/KB-RT30 network terminal can be used in schools, hospitals, shopping malls, and factories.

FEATURES

- Rack mount design, suitable for cabinet installation
- High efficient two Channel network audio transmission design, 50% cost down
- Apply DSP stereo sound disposal technology enabling better sound reproduction capability
- With intelligent cooling technology
- Auto constraint of output voltage, better electromagnetism compatibility
- Full range protection

CD / MP3 / FM ALL-IN-ONE AUDIO PROCESSOR

KB-SAP04

For mid-to-large Public Address users who need highly energy efficient and cost-effective solution, KB-SAP04 All-in-One Audio processor is able to deliver pro-audio level performance, globally complaint quality and more cost effective solution.

FEATURES

- Integrated with CD player, USB port, SD slot and support MP3 music playing and FM tuner
- Three play modes: SINGLE/ALL/ REPEAT
- Internally preset 10 programs in FM

KB-MP3

DIGITAL AUDIO PLAYER

KB-MP3 with programmed playing is a digital audio player as a part of PA system, ideal for use in schools, hotels, shopping malls, office buildings, parks, etc. The player has a built-in chip with high accuracy and a temperature compensating circuit that has been added to avoid time error caused by climate. With 1 timing output (short circuit signal), it can be self controlled automatically. Multiple functions of playing (single play, single circle, sequenced play, circle all, group play, random play) and 99 more steps of timing programs support multiple brands of U disk within 1GB.

- A 128*64 LCD, multi-functional menu, clear working status, diagram interface and convenient operation
- Built-in monitor speaker with volume control knob
- U disk storage with a flexible capacity and could enable 1G U disk
- A short circuit output for automatic control
- 1 alarm activation signal input (input signal is short circuit signal, valid at low PWL) to control the alarm output
- 1 timed activated signal input (input signal is short circuit signal, valid at low PWL) to enable timing control of the exterior timer
- 2 external control of power output enabling manual control and timed control, 1000W output for each

TG-1000A / TG-1000B

AUDIO CONVERTER AND BOOSTER

Balanced transmission can be achieved by using TG-1000A together with TG-1000B, which is a common way of long distant audio signal transmission. The advantage of a balanced transmission is noise immunity, whose principle is to use the offset of the phase to minimize noise interference, thus facilitate distant transmissions of analog audio signal over 1 km or more featuring low distortion and low power consumption.

- Dual inputs and adjustable output level for TG-1000
- 3 High-quality outputs for close connection to peripheral devices or amplifiers for TG-1000B
- Hi-fi audio quality with wide frequency response
- Optional, flexible way to feed power and versatile connectors
- High compact, stylish and suitable for any indoor installation application
- Low distortion, low power consumption far transmission capability can reach effective distance over 1 km
